MITILAN DEPAK RA

Flutter Developer

mitilan02@gmail.com | +91 8220617220 | Tamil Nadu, India

PROFESSIONAL SUMMARY

Flutter Developer with 1.4+ years of hands-on experience building and maintaining production-grade cross-platform mobile applications (Android & iOS) across ecommerce, real estate, food delivery, and service domains. Proficient in Bloc state management, REST API integration, Firebase Cloud Messaging (FCM), and payment gateway integration (Razorpay, Stripe). Experienced in multi-role workflow systems, app deployment on Google Play Store and Apple App Store, and delivering scalable, user-centric solutions.

TECHNICAL SKILLS

Languages & Frameworks: Flutter, Dart
State Management: Bloc (Business Logic Component)
Backend Integration: REST APIs, JSON parsing, Error handling, Data optimization
Firebase: Cloud Messaging (FCM) – Foreground, Background & Terminated states
Payment Gateways: Razorpay, Stripe (Success, Failure & Retry flows)
App Deployment: Google Play Store, Apple App Store (end-to-end release management)
Architecture: Role-based systems, Workflow-driven design, Scalable app architecture
Version Control: Git
Platforms: Android, iOS

PROFESSIONAL EXPERIENCE

Flutter Developer | Smarther Technologies *Dec 2024 – Present*

- Developed and maintained 6+ production Flutter applications across ecommerce, real estate, food delivery, and service platforms.
- Implemented Bloc state management to build scalable, testable, and maintainable app architecture.
- Integrated Firebase Cloud Messaging (FCM) with custom notification handling for foreground, background, and terminated app states.
- Integrated payment gateways (Razorpay, Stripe) enabling secure online transactions with full coverage of success, failure, and retry scenarios.
- Managed end-to-end app deployment on Google Play Store and Apple App Store, including new releases and version updates.
- Collaborated with backend teams to optimize API performance and ensure seamless cross-platform data flow on Android and iOS.
- Implemented product ordering, service booking, and payment tracking systems in hybrid platform applications.

KEY PROJECTS

Service Center Management Application — Multi-Role Workflow System

- Architected a complex role-based Flutter application supporting Technicians, Sub-Technicians, Delivery Partners, Pickup Personnel, and Telecallers within a single unified platform.
- Designed and implemented a complete end-to-end service lifecycle workflow: Pickup → Assignment → Repair → Delivery.
- Built dynamic role-based landing UI with controlled feature access to enforce role-specific permissions.
- Implemented status-driven workflow management (Cancelled, In Progress, Completed) across all user roles.

- Enabled technicians to self-assign tasks or delegate to sub-technicians for flexible task routing.
- Integrated Firebase push notifications with custom alert sounds for real-time service update delivery.
- Implemented date-based filtering (daily, monthly, yearly) for efficient service history tracking and reporting.
- Ensured real-time data synchronization across multiple roles for seamless coordination.

Ecommerce + Home Service Application

- Developed a hybrid platform combining product purchasing and home service booking in a single app.
- Implemented complete cart, checkout, and secure payment flow using Razorpay and Stripe payment gateways.
- Handled all payment states — success, failure, and retry — to ensure reliable and uninterrupted transaction experience.
- Integrated REST APIs for dynamic product and service listings with real-time inventory updates.

Real Estate Customer Application

- Built features for maintenance booking and modification requests with structured customer interaction workflows.
- Implemented a payment history tracking system for improved financial transparency for end users.
- Designed workflow-driven UX to streamline customer service and property management operations.

Food Delivery Applications

- Developed multiple food ordering applications handling the complete order lifecycle from order placement to delivery.
- Integrated push notifications (FCM) for real-time order status updates and customer communication.
- Optimized UI performance to ensure smooth and responsive user experience on both Android and iOS.

Deals & Service Applications

- Built applications for deal discovery and service workflows with advanced filtering and listing features.
- Implemented user interaction features including search, filter, and dynamic listing for improved discoverability.

EDUCATION

B.E. Computer Science and Engineering *2020 – 2024*
